EXPERIENCE

Prolaksh IT Solution

Software Developer Intern

Aug 2026 – Present

Remote

- Rebuilt core website UI using **Next.js**, **React.js**, and **Tailwind CSS**, shipping reusable components and animated layouts that improved responsiveness across devices.
- Built a responsive **contact form** with client-side validation and a dedicated **API endpoint**, ensuring reliable form submission and user inquiry handling.

Digital Mongers

Software Developer Intern

Apr 2026 – June 2026

Bareilly, India (On-site)

- Built production-ready full-stack web applications using **Next.js**, **React.js**, **Node.js**, **Express.js**, and **MongoDB**, integrating secure **REST APIs** with **Axios**, **Fetch API**, and **Zustand**.
- Built a full **JWT**-based authentication and authorization system — OTP verification, password reset, protected routes, and RBAC — strengthening application security and user management.
- Optimized backend services, API integrations, and validation workflows with robust error handling, boosting API reliability, scalability, and data security across multiple applications.

InvisiaX

Software Developer Intern

Jan 2026 – March 2026

Remote

- Developed **Campus Pulse MVP**, a scalable college ID verification platform using **React Native**, **Node.js**, **Express.js**, and **MongoDB**, reducing manual verification time by **60%**.
- Engineered an end-to-end document verification pipeline with **Google ML Kit**, achieving **95%+ accuracy** across **10+ ID formats** and reducing false rejections by **35%**.
- Designed secure validation and verification workflows with robust backend processing, improving reliability, data consistency, and overall user onboarding experience.

PROJECTS

DevPilot AI – Multi-Agent Developer Assistant 🔗 | [Python](#), [FastAPI](#), [CrewAI](#), [FAISS](#), [Redis](#)

- Developed a **Hybrid Code RAG engine** using **AST chunking**, **BM25**, **FAISS (bge-small-en-v1.5)**, **RRF**, and **Cross-Encoder reranking**, improving retrieval accuracy for code search.
- Implemented a **5-stage multi-agent system** (Planner, Coder, Reviewer, Debugger, Executor) with **Celery + Redis** and isolated **Docker sandboxes** for asynchronous code execution.
- Engineered an **async FastAPI gateway** with **SSE token streaming**, **Redis response caching**, and in-memory telemetry for **latency percentiles** and **LLM token usage**.

VOX HIRE – AI Recruiter Voice Agent 🔗 | [Next.js](#), [Supabase](#), [Vapi AI](#), [Tailwind CSS](#)

- Architected a real-time voice screening pipeline using **Vapi WebRTC**, **Deepgram STT**, **Azure TTS**, and **OpenRouter**, with low-latency voice interaction and live Canvas audio visualization.
- Engineered a scalable **Next.js 16 API gateway** with **Redis sliding-window rate limiting**, **RabbitMQ-based async processing**, and multi-tier LLM fallback for reliable request handling.
- Designed **Supabase PostgreSQL** schemas and an automated evaluation engine generating a **competency matrix**, candidate leaderboards, and client-side PDF reports using **jsPDF**.

TECHNICAL SKILLS

Languages: C++, Python, TypeScript, JavaScript

Frontend: Next.js, React.js

Databases: MongoDB, PostgreSQL, Redis

AI Engineering: LangChain, RAG, FAISS, CrewAI, Multi-Agent Systems

Tools: Docker

Backend: FastAPI, Node.js, Express.js

Core CS: DSA, DBMS

EDUCATION

MJP Rohilkhand University, Bareilly

Bachelor of Technology in Computer Science

2023 – 2027

Bareilly, India

ACHIEVEMENTS

- Solved **500+** problems on **LeetCode**.
- Secured **1st Position** in **Agglomeration**, an inter-college **DSA Coding Competition** with **2 rounds**.
- Secured **1st Position** in an inter-college **Debugging Coding Competition** with **3 rounds**.
