EDUCATION

MJP Rohilkhand University, Bareilly

Bachelor Of Technology in Computer Science

2023 - 2027

Bareilly, India

PROJECTS

SkillForge – AI Career Coach | Next.js, Tailwind CSS, Prisma, Gemini API

- Architected and deployed a full-stack career preparation platform using **Next.js 15**, **React 19**, **Prisma ORM**, and **PostgreSQL**, integrating AI-based resume builder and mock interview modules; improved ATS relevance by **40%**.
- Integrated **Google Gemini API** for AI-driven resume optimization and interview feedback using prompt engineering; reduced manual effort by **50%** through automated content generation.
- Engineered scalable backend workflows with **Clerk authentication**, **Inngest event processing**, and deployment on **Vercel + Neon**, optimizing API latency by **35%** and maintaining **99.9% uptime**.

Real-Time Chat Application (Microservices) | MERN Stack, RabbitMQ, Socket.IO, Redis, Docker

- Built** a scalable real-time chat application using the **MERN stack** and **Socket.IO**, enabling low-latency bi-directional messaging with event-driven architecture.
- Designed** a microservices-based backend with **RabbitMQ** for asynchronous inter-service communication, improving modularity, service isolation, and concurrent message handling.
- Enhanced performance and security** by implementing **OTP-based authentication**, **JWT session management**, **Redis caching**, and containerized deployment using **Docker Compose**.

AI-Enabled EdTech Platform | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack **AI-powered Learning Management System (MERN)** with student/instructor dashboards, course management, and responsive UI using **React**, **Redux Toolkit**, **Tailwind CSS**, **Node.js**, **Express**, and **MongoDB**, implementing RESTful APIs and modular backend architecture.
- Integrated **Google OAuth 2.0** and **Razorpay** for secure authentication and real-time payment processing, implementing protected routes and role-based access control to ensure secure user access and transaction handling.
- Implemented **AI-powered smart search** using **Gemini API**, optimizing query handling and improving course discovery efficiency by **30%** across the platform.

INTERNSHIP

InvisiaX

Jan 2025 – Feb 2025

Software Development Engineer Intern

Remote

- Engineered the **Campus Pulse MVP** by building a secure **College ID Scan & Verification** system using **React Native**, **Node.js**, **Express.js**, and **MongoDB**, integrating **Google OAuth 2.0** for authenticated student onboarding.
- Designed and implemented an end-to-end verification pipeline (**ID upload** → **ML Kit OCR/QR extraction** → **rule-based validation** → **status update**), reducing manual verification effort by **60%**.
- Developed robust validation logic to verify **college name**, **roll number**, and **ID validity/expiry**, handling low-quality scans and inconsistent ID formats, improving verification accuracy by **35%**.
- Technology Used:** React Native, Node.js, Express.js, MongoDB, Google OAuth 2.0, ML Kit (OCR/QR), REST APIs.

TECHNICAL SKILLS

Languages: C++, JavaScript(ES6+)

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Redux Toolki

Backend: Node.js, Express.js

Database: MongoDB, PostgreSQL

Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel

Relevant Coursework: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOPS), Database Management Systems (DBMS), Computer Networks
